EV Charging Stations in San Juan County

OPALCO offers FREE EV charging stations on San Juan, Lopez and Orcas islands. Many businesses are also offering free charging. Learn more at www.opalco.com/energy-savings

A Ductless Heat Pump is a highly efficient heating and cooling system that can be easily installed as a new primary heat source. Ductless systems heat and cool homes at a fraction of the cost of baseboards and wall heaters, and do a better job of distributing warm or cool air around your home. If you switch from propane or wood heat, you also substantially reduce your carbon footprint on the environment, while saving money on your overall energy costs.
