

## VINCE DAUCIUNAS

---

Vince and his wife Vikky have been residents of San Juan Island since 2002. Vince currently serves as the President of the OPALCO Board of Directors, and is seeking a third term. He also serves on the Board of the Friday Harbor Animal Shelter, enjoys flying and holds a Commercial Pilot certificate.

Vince's education includes Bachelors and Masters Degrees in Electrical Engineering from Notre Dame and UC Berkeley. After working at NASA's Jet Propulsion Laboratory, he spent 26 years with Hewlett Packard and Agilent Technologies in Research and Development, Management and Business Development.

His experience includes system development for measurement, computation and communication in a variety of industries, including Power Generation, Telecommunications and Environmental Science. He was responsible for Strategic Planning in the Chemical and Life Sciences Group, which has grown to be a \$4.2B business. In his last position, he was VP at Symyx Technologies, a company focused on discovering new materials for use in many areas, including fuel cells, advanced batteries and renewable fuels.

"I'm proud of the work OPALCO does and honored to be associated with the capable and hardworking people that make it happen. The industry is undergoing significant change. I am excited by the opportunities we have to improve the safety, reliability and affordability of our power system. We're completing work on our fiber backbone which will help reduce the number of outages, decrease time to restore power and improve efficiency. Increased local renewable generation and power storage will help us meet peaks, and decrease power purchases from the mainland. Conservation will continue to help reduce the long-term load growth. And, our subsidiary Rock Island will keep growing and providing excellent fiber and wireless broadband services to our county. Our Coop has an exciting future, and I hope to continue contributing to it as one of your Board members!"
